TABLE 89. Peak theoretical performance of the fastest centrally administered high-performance computing systems in academic institutions, by computing architecture: FY 2009

Architecture	Number of institutions	Peak theoretical performance			
		1 teraflop	2 teraflops	3 teraflops	Greater than 3 teraflops
Clusters	128	8	19	15	86
Massively parallel processors	24	4	4	3	13
Symmetric multiprocessors	26	7	8	1	10
